- Project 1: Akyra TAS Sukhumvit Bangkok (Hotel, Bangkok)

1. AKYRA TAS SUKHUMVIT BANGKOK

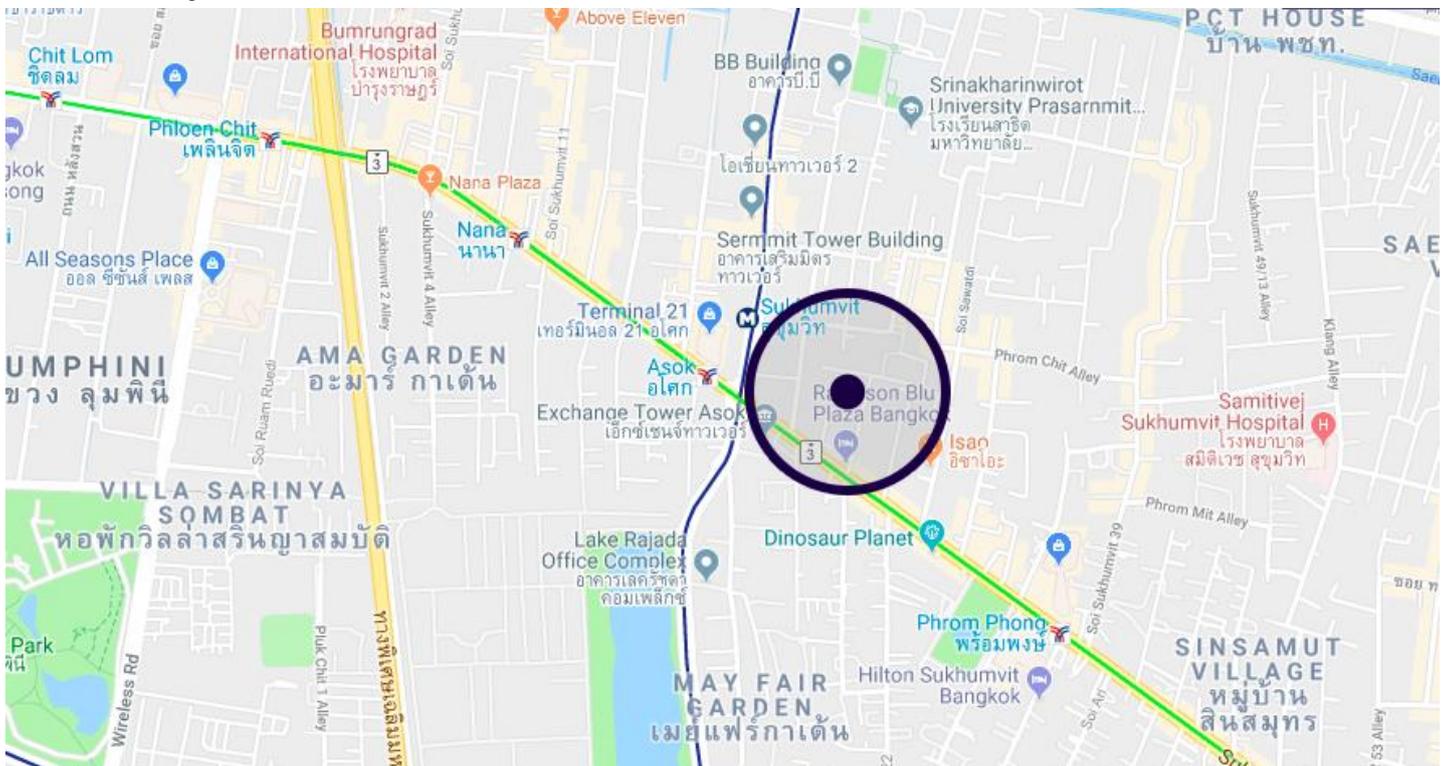

Project Overview

The 50-room Akyra TAS Sukhumvit Bangkok is located in Sukhumvit Soi 20, close to Emporium and EmQuartier shopping malls. Developed by the Akaryn Hotel Group, the property aims to become the first new hotel in Asia to launch without single-use plastic in its rooms or food and beverage outlets. Self-service drinking water is dispensed on every floor to make refills easy and guests can also take their bottles with them on excursions and shopping trip around the city. Bathroom amenities are in locally manufactured “celadon” pottery containers filled with essential oil-based products, while biodegradable bin bags are used in all rooms and shopping bags are available to encourage guests to refuse plastic bags when shopping.

The design combines the simplicity of natural woods with accents of modern-retro chic displayed in everything from the furnishings to the artwork.

Rooms have floor-to-ceiling glass doors that slide open onto balconies, designed for admiring the city's landscape.
