- Project 1: Siri House Dempsey (Property sales gallery, Singapore)

1. SIRI HOUSE DEMPSEY

Project Overview

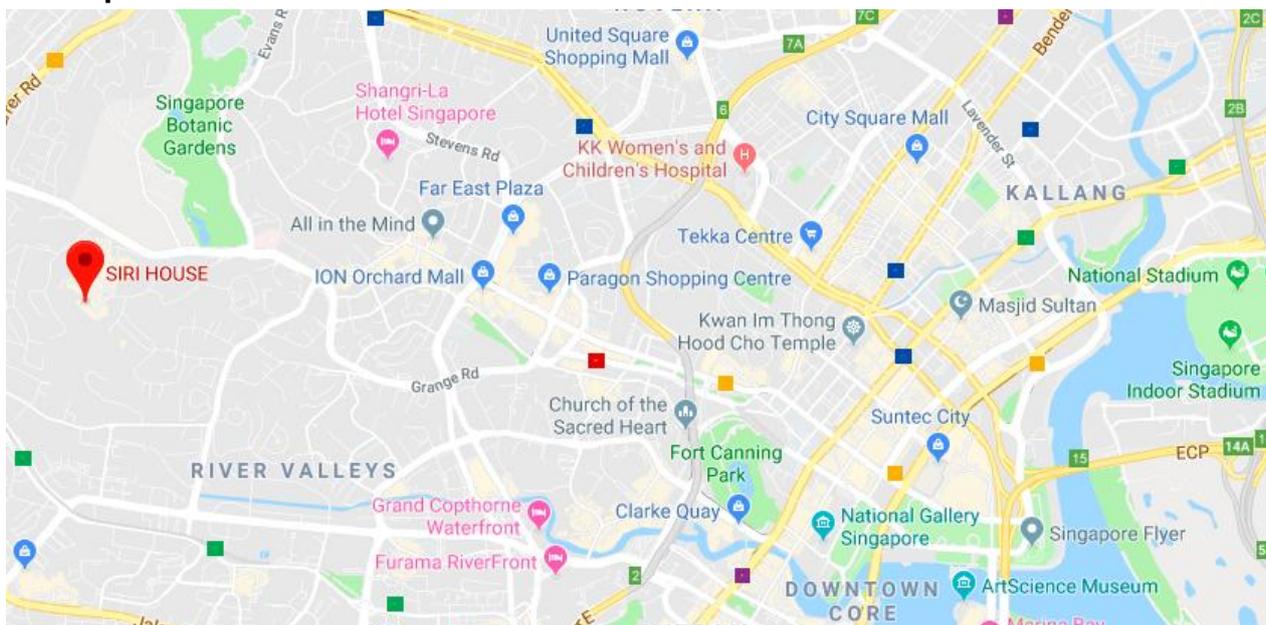

Siri House at Dempsey is a new lifestyle, social and dining space by Sansiri, a major property developer from Thailand. It encompasses a sales gallery showcasing Sansiri's property developments; a restaurant called JAM; an art space for exhibitions by Thai and international artists; and a shop retailing established and upcoming design brands from Thailand.

The sales gallery was been designed by interior designer Vichada Sitakalin, featuring eclectic stylings with bold graphic patterns in a striking color palette, and furnished with luxury interior textiles and wall coverings by Jim Thompson Fabrics. The interior will change every 6 to 8 months to showcase Sansiri's most prestigious property developments as prime real estate investment opportunities for visitors of Siri House. The space also functions as inspirational ideas for home design and interiors, as well as hosting small events.
